Billet Pressure Relief Valve

Part Number- BPR

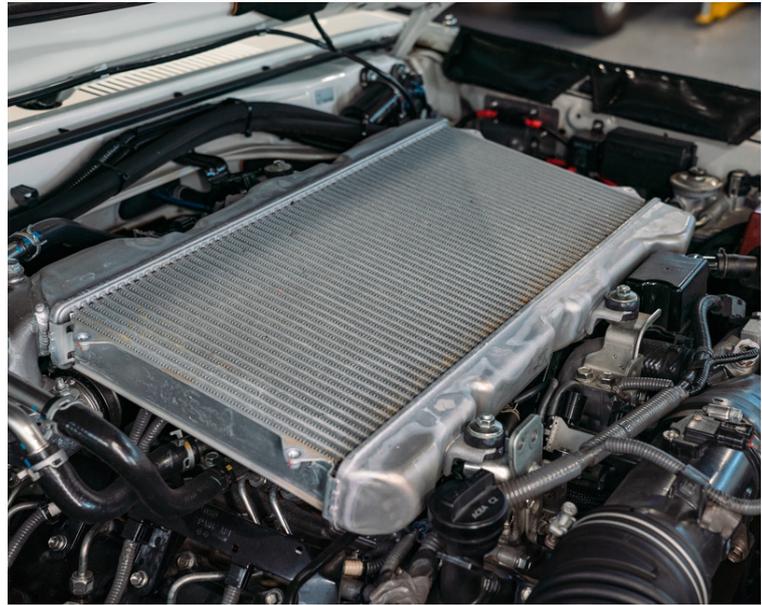

Minimum Tooling Required

- > Tension Wrench - Suitable to 155Nm
- > 3/8 Drive ratchet
- > 10, 12, 14 & 19mm Socket
- > 14mm & 19mm Spanner
- > 3/8 Extension 75mm or 150mm
- > Engine Assembly Grease

- > Remove Intercooler top trim pannel

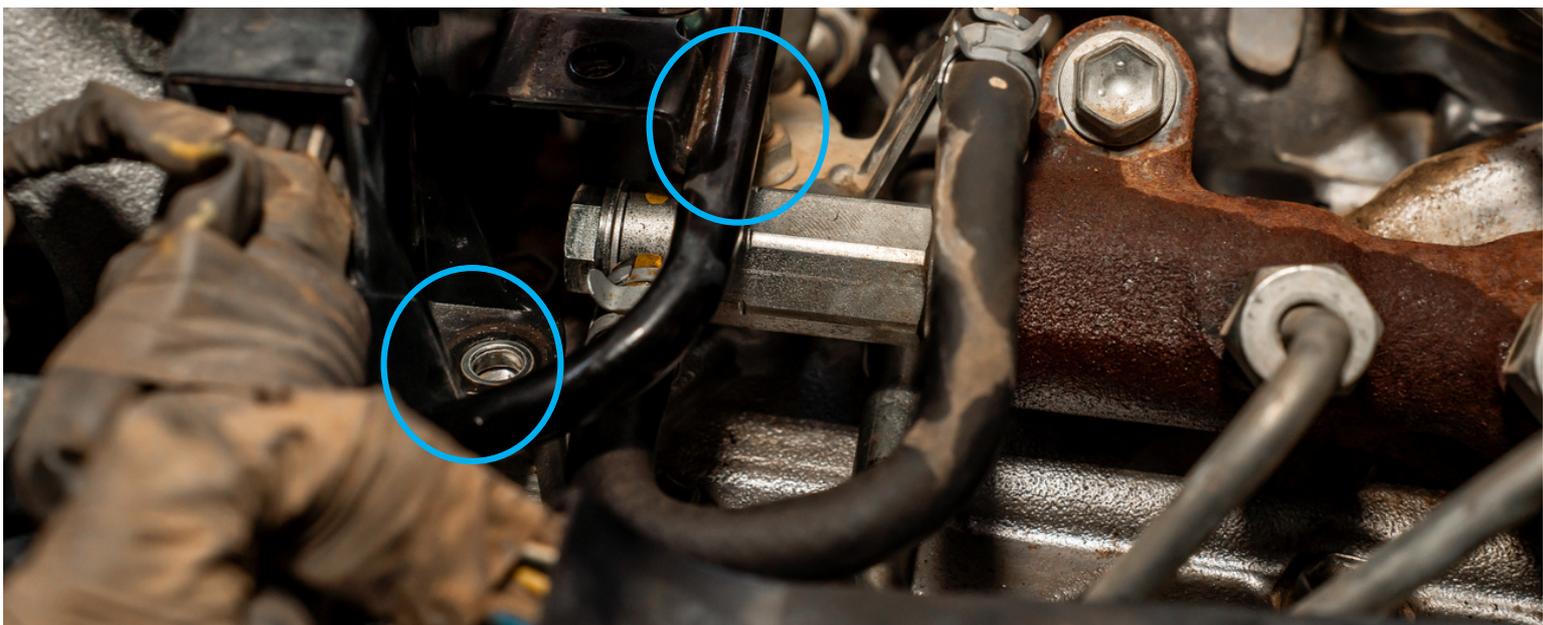

- > Remove Intercooler Assembly

- > Ensure you remove electrical connectors and sensor from MAP Sensor, vacuum line & IAT Sensor at rear of intercooler

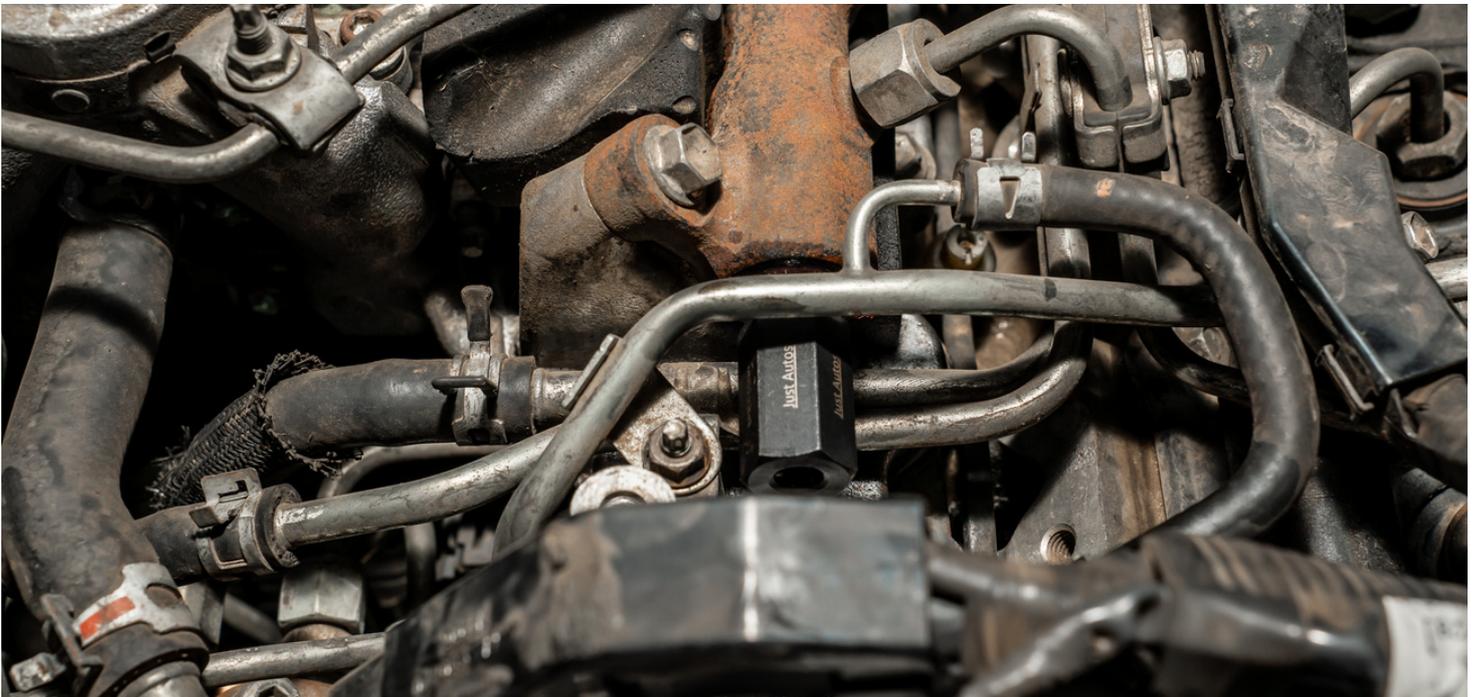

- Clean down local area from all foreign environmental material and debris
Locate factory pressure relief valve in end of common rail on passenger (LHSF)
Remove bolt and vacuum line impacting on access to valve (DPF Models)
Remove factory fuel return line from end of pressure relief - Ensure to keep banjo washer for re-use.

- Apply grease to the thread and mating surface of BPR

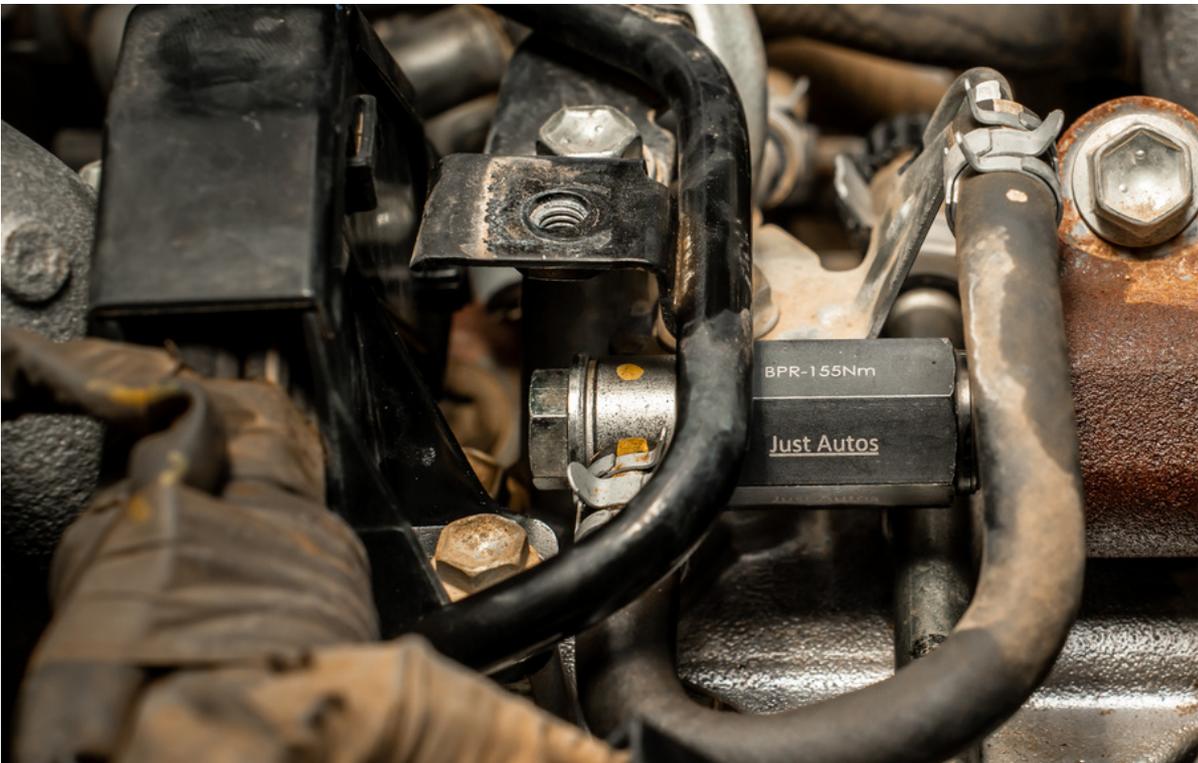

- Install BPR into common rail by hand

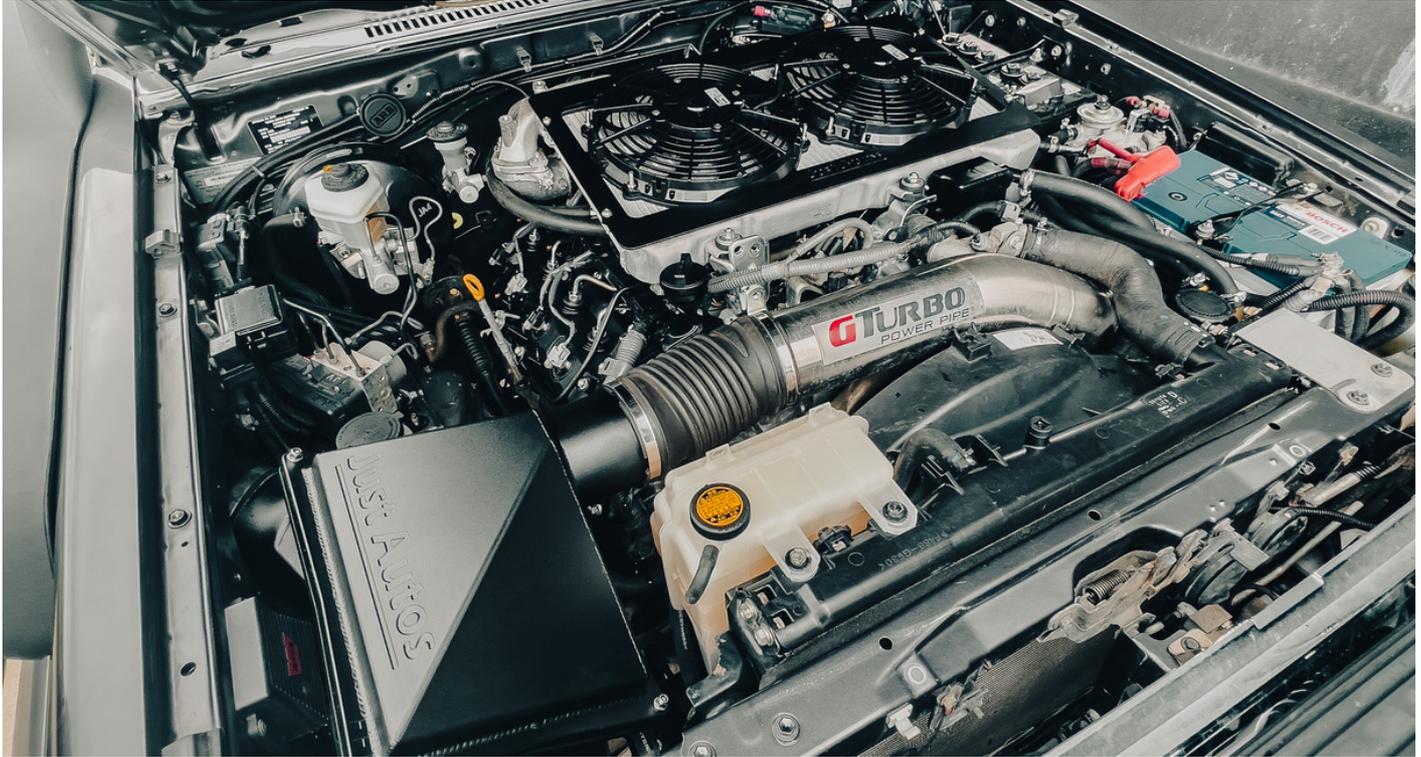

- > Apply torque wrench and socket to BPR with setting of 155Nm

- > Once tension has been met, reinstall return line as required along with previously removed interfering vacuum line

- Reinstall intercooler and reconnect sensors and input connectors.
Start vehicle inspect area for diesel leak
If leak found repeat installation inspection from page 2 & Reinspect tension level.

Thank you for choosing to purchase the Just Auto’s Intercooler Fan Kit and taking the time to install it.

We appreciate your trust in our brand and the time we have put into the research and development of all the products for the VDJ200 platform. If you have any questions or feedback from the installation process we would be more than happy to hear from you.

Myself and the team wish you all the best and look forward to speaking to you in the future.

A handwritten signature in black ink that reads 'Matt Smith'.
