

Introduction: We are issuing an important update regarding the maintenance schedule for the 300 Series vehicles. Due to the increased performance capabilities, frequent towing, and the small sump capacities of these vehicles, we have observed that engine oil tends to degrade more rapidly under these conditions. To ensure optimal engine health and longevity, we are suggesting a revised service

Please review the details of this bulletin and implement the new service schedule accordingly. Your adherence to this revised maintenance plan is essential for the continued reliability and performance of your 300 Series vehicle.

- Details:**
- Previous Service Intervals: 10,000km
 - Affected Model: FJA300
 - High Load Situations: (Refer to owners manual)
 - Concern: Oil breakdown (Due to high oil Temperatures)

- Repair:**
- New Service intervals: 5000km (Follow severe service schedule)
